Humanitarian Icons

Version 3.0 - 377 icons in 19 categories

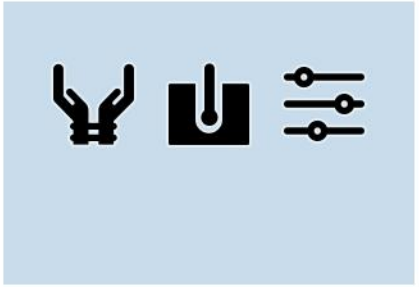

Every icon is a character in the font Humanitarian-Icons, and a ready-made symbol in the ArcGIS Pro and QGIS style files.
The symbols are 15 pt, black, with a thin white halo (0.5 pt, half transparent) so they stay readable on any map colour.
Size and colour can be changed in your software. The halo is part of the symbol.
Install the font first, then the style file for your software. See the install guide for the steps.
Icons are listed by category, then alphabetically. Under each icon is its name and its character code (Unicode).
